1.PRINT NUMBERS FROM 1 TO 50:

```
 public class number{
 public static void main(String[]args){
 int i=1;
 for(i=1;i<=50;i++)
{ System.out.println(i);
}
 }
}
```

2.ODD NUMBERS FROM 1 TO 100:

```
public class odd{
   public static void main(String[]args){
      int i=1;
      for(i=1;i<=100;i++){
         System.out.println(i);
         i +=1;
      }
   }
}
```

3.SUM OF NUMBER FROM 1 TO 100:

```
public class sum{
   public static void main(String[]args){
      int i=0;
      int sum=0;
      for(i=0;i<=100;i++)
      {
         sum=sum+i;
      }
      System.out.println(sum);
   }
}
```

4.MULTIPLICATION TABLE:

```
import java.util.Scanner;
public class table{
    public static void main(String[]args){
      Scanner sc=new Scanner(System.in);
      int i=sc.nextInt();
```

```
    int a=sc.nextInt();
    int b=sc.nextInt();
    for(i=1;i<=10;i++)
    {
      System.out.println(i+"x"+b+"="+(i*b));
    }
  }
}
```

5.FIND THE FACTORIAL OF A NUMBER:

```
public class factorial{
  public static void main(String[]args){
    int i=1;
    int fact=1;
    for(i=1;i<10;i++)
    {
      fact=fact*i;
      {
      System.out.println(fact);
      }
    }
  }
}
```

6.BETWEEN 1 TO 100 DIVISIBLE BY 7:

```
public class divisible{
  public static void main(String[]args){
    int i=0;
    int count=0;
    for(i=0;i<=100;i++)
    {
      if(i%7==0)
      count++;
    }
    System.out.println(count);
  }
}
```

7.PRINT NUMBER FROM 100 DOEN TO 1:

```
public class main{
  public static void main(String[]args){
```

```
    int i=1;
    for(i=100;i<=1;i--)
    {
      System.out.println(i);
    }
  }
}
```

8.SUM OF ALL EVEN NUMBERS FROM 1 TO N:

```
public class even{
  public static void main(String[]args){
    int x=0;
    for(int y=1;y<=20;y++){
      y=y+1;
      x=x+y;
    }
    System.out.println(x);
  }
}
```
